

# Flexible hot desk lockers systems

Flexible offices need a flexible hot desk lockers system which adapts to employees locations, work time and frequency of work.

# Open office

Primarily used in open office and so called „activity based“ offices. Employees change locker based on place of work inside the building.

## Permanent hot desk lockers

Basic user interface is used to check RFID card ID and accordingly open the right locker assigned to the presented card. Reservations are managed by system administrator.

# One user interface per each location

Seamlessly integrates into the locker's surface and complements the design.

# One user interface per lockers location

Can also be positioned between locker racks on a special surface.

# Available electronic locks

**Automatic** open

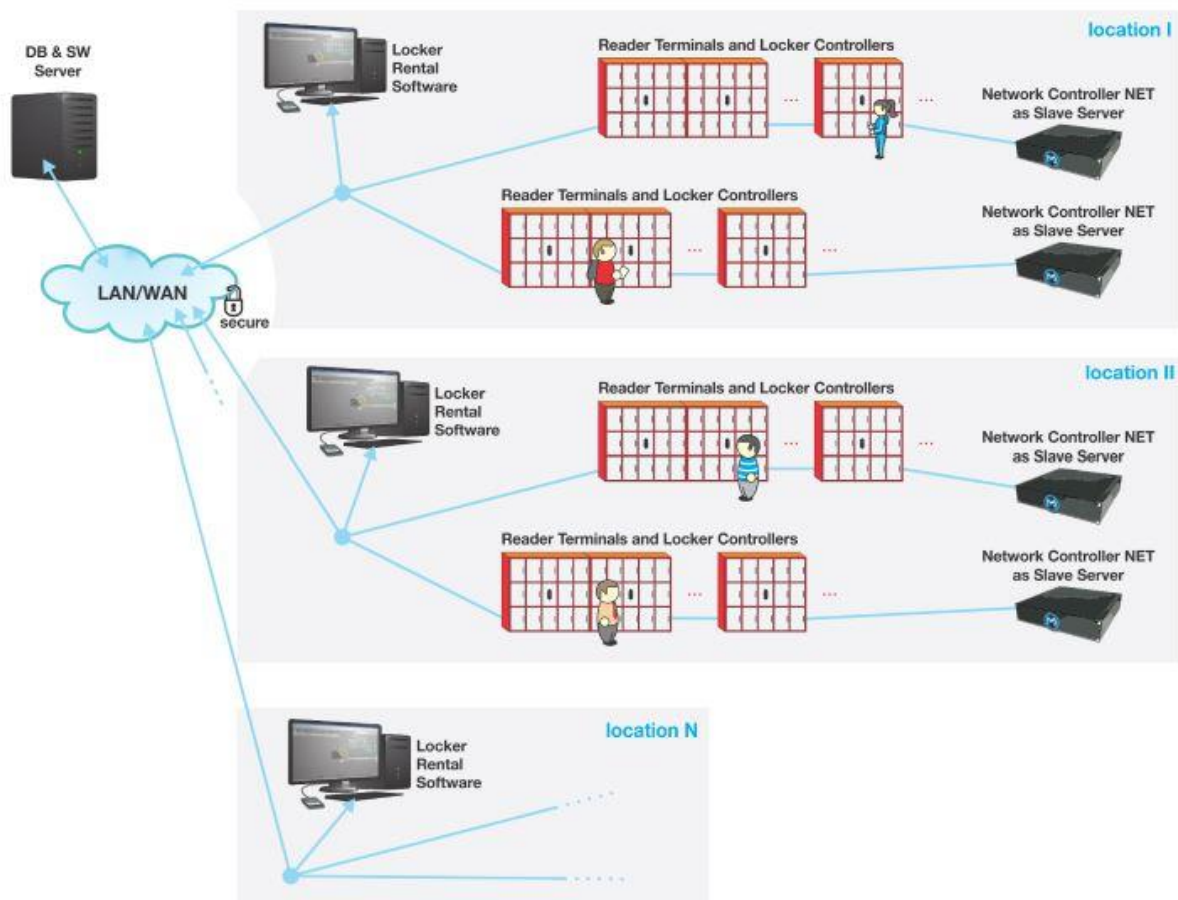

**Push** to open

**Pull** to open

# Joining various locations

Connect main and other offices in cities around the world.

# Component of an integrated system

Integrate office lockers, access control, time & attendance, office table readers and other components worldwide.

# Integrations and Connectivity

System can easily be integrated with other IT systems your organization is using on a daily basis.

- XML and other data formats
- Access control systems
- Office management systems
- Meeting room reservation systems

# Reporting

The system is purposed to provides a large amount of data about lockers usage and employees activities.

It also allows an overview of the access control rights and management of the lockers.and other components of the system

**You customers can use default software reports or 3rd party solution to export data to.**

# Security management
